Midmark Examination Chairs

Accessibility in healthcare goes beyond the ability of patients to access the care they need. The physical accessibility of a facility and the equipment within it plays a significant role. The proper exam chair is important in providing a thorough examination. Midmark Barrier-Free® examination chairs make accessing the exam chair easier, even for those with mobility concerns.

Midmark 627
Barrier-Free
Examination Chair

Standard Features

- 1. Barrier-Free Low Chair Height**
makes accessing the exam chair easier for all types of patients.
- 2. Powered Back and Height**
assists in positioning the patient for more comfortable examinations.
- 3. Clean Assist™ Roller System**
is a retractable roller base that allows you to easily and safely move the chair for cleaning.
- 4. Standard Stirrups**
are integrated into the exam chair for lower-body examinations.
- 5. Pelvic Tilt**
makes proper exam positioning easier.
- 6. Front Storage Drawer**
gives you room to store supplies at the point of care.
- 7. Active Sensing Technology®**
pauses chair movement when disrupting impact is detected.

BP Position
The Midmark 627 with Patient Support Rails Plus™ help achieve proper patient positioning for blood pressure capture—arm supported at heart height, back supported and feet flat on the floor.

Elevated Flat Position
Easily position patients in a supine or Sims position at a working height that is more comfortable for the provider who prefers to work from a standing position.

Lithotomy Position
Easily position patients for lower-body examinations at a working height that is comfortable for the provider.

Ritter Examination Chair

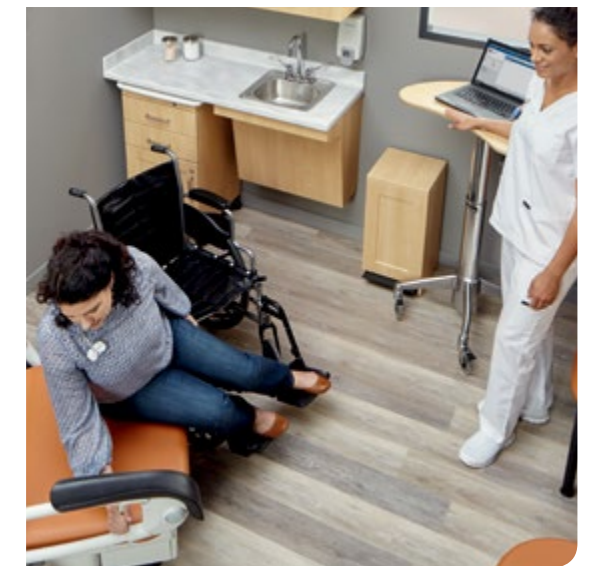

If you're still using a standard, non-adjustable examination table, chances are there have been patients you've had to examine while they sat in a side chair or wheelchair because they couldn't get onto the examination table. This compromises the exam—ensure that your patients receive equal access to quality care regardless of mobility. Ritter examination chairs by Midmark adjust in height to make it easier for even the frailest patient to be seated.

Help patients help themselves.

A low seat height of 46 cm (18") and wide, flat transfer surface enable patients to transfer onto and off of the exam chair with minimal assistance.

Ritter 224
Barrier-Free®
Examination Chair

Standard Features

Stirrups and Pelvic Tilt
Help position patients properly and comfortably for lower-body examinations.

Accessories

Patient Support Rails Plus™
Helps achieve proper positioning of the patient's arm for blood pressure capture.

Patient Support Rails™
Provides patients with a 1¼ inch diameter continuous gripping surface for entering, exiting or repositioning on the exam table.

Assist Arms
Designed to offer patients a stable gripping surface for accessing the chair and a sense of security during positioning.

Foot Control
Standard foot control designed to make patient positioning quick, effective and always within reach. (224-011 foot control shown)

Accessory Receivers
Standard receivers are designed to make the integration of accessories easy and efficient—no tools required.

Articulating Knee Crutches
The unique ball-socket design allows for a maximum range of adjustment, designed to ensure optimum knee and leg support. Available in a non-articulating option.

Supply Assistant
Provides extra storage for bulky exam supplies. Keeps drapes, gowns and similar items within easy reach.

Stainless Steel Treatment Pan
Ideal for lower-body procedures or other situations in which removal of fluid and debris is necessary.

Optional Feature

Clean Assist™ Roller System
The retractable roller base allows you to easily and safely move the chair for cleaning. (available on the 627-011 model only)
